DETAILED ACTION

1. Claims 9 is generic to a plurality of disclosed patentably distinct species comprising (1) polyester (Class 428, subclass 480), (2) polyolefin (Class 428, subclass 523), (3) paper (Class 428, subclass 537.5), (4) metal foil (Class 428, subclass 469), (5) polyvinyl chloride film (Class 428, subclass 522) and (6) cloth (Class 442, subclass 132). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Mr. Richard E. Fichter on August 14, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. S. Nakarani whose telephone number is (703) 308-2413. The examiner can normally be reached on Tuesday-Friday.
